Dear Bob -

Thanks for the "front page" notice on the fix I sent in, as well as the volunteer tester notice. Can't say I've been exactly deluged with test requests.

It is with pleasure that I remit to you the required \$10<sup>00</sup> for another year of the Arcadian - I eagerly look forward to it each month.

Looks like Bally sent out a few of the 2 new cartridges late last week - I hear from someone who has one (a dealer I'm friendly with) that the pinball is quite good, and the Space Invaders is incredible! Very much like the "real" arcade game of the same name!

~~Hope you can send me the rest of the dated requested <sup>soon</sup> PA-1 & Executive~~ - esp. PA-1. I have a contact here who's willing to explore possibilities of add-on RAM +/or ROM, + possibly expanded BASIC. But I need all the "hard core" technical info I can get my hands on for him to be able to even make a reasonable stab at it - any suggestions? Anything else in this area that you could get for me or refer me to so I can get it for myself would be most appreciated.

By the way, I responded to your Bally survey but you didn't send me any "details" on Keyboard Memory Unit - please do so as I am interested.

I thanks again + keep up the good work. Phil Shafer
